Dear Mr. Graham:

This refers to the announced initial radiation safety inspection conducted by Mr. R. A. Leonardi of this office on October 10, 1990, of the activities authorized by NRC Byproduct Material License No. 25-27024-01, and to the discussion of our findings held by the inspector with you at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

No violations or deviations were identified.

During the inspection, the inspector discussed with you: (1) the safety aspects of your licensed activities and compliance with regulatory requirements, (2) the NRC and DOT requirements, (3) the licensee's commitments made during the licensing process, and (4) the NRC enforcement policy.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
