RE: Disposition of Radioactive Material at Poplar Bluff
Hospital (Expired License Nos. 24--08824-03 and 24-26924-04)

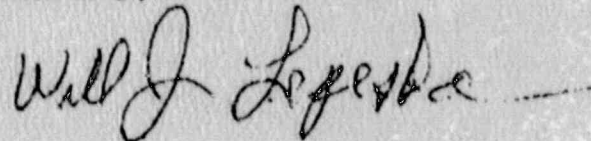

Dear Mr. Parker,

Attached find the completed NRC Form 314 "Certificate of Disposition of Materials" for both the teletherapy and the remaining radioactive material as shown on the inventory. Also find with these forms, transfer information and survey reports indicating that with this action the facility and thus Hospital Financial Corporation is in full compliance.

As you are aware from previous correspondence Hospital Financial Corporation was not the licensee, however due to the circumstances of the hospital we became liable and certainly wish to comply with regulations to insure proper health and safety practices.

Hopefully the information submitted will settle this problem and insure that no radiation hazard exists at this site. Thank you for your thoroughness and help completing this project.

Sincerely,

Will J. Lipeska, President
Hospital Financial Corporation
