Gentlemen:

In the Matter of)
Tennessee Valley Authority) Docket Nos. 50-327
50-328

SEQUOYAH NUCLEAR PLANT (SQN) - FOLLOW-UP LETTER FOR MARCH 21, 1994,
TELEPHONE CONVERSATION REGARDING TECHNICAL SPECIFICATION (TS)
CHANGE 93-21, "REVISION OF FIRE DETECTION INSTRUMENTATION"

Reference: TVA letter to NRC dated February 9, 1994, "Sequoyah Nuclear
Plant (SQN) - Technical Specification (TS) Change 93-21,
'Revision of Fire Detection Instrumentation'"

This letter is in response to a telephone conversation on
March 21, 1994, between J. D. Smith (TVA) and D. E. LaBarge (NRC)
concerning the referenced TS change.

The referenced submittal and its enclosures identified a TS change that
added fire detection instrumentation. In that submittal, TVA stated the
modifications associated with the referenced TS change were complete.
This statement was in error in that the modifications have not been
completed. This error was a result of miscommunication. Specifically,
the modification was originally identified as a Unit 1 restart item at
SQN. The modification was subsequently reclassified as a priority item
and the scheduled completion date was extended. The change in schedule
was not adequately communicated.

By this submittal, TVA is notifying NRC that the modification associated
with the referenced TS change is presently scheduled for completion by
May 31, 1994. Therefore, TVA requests that NRC not issue TS 93-21
before this date.

If you have any questions concerning this submittal, please telephone
J. D. Smith at (615) 843-6672.

Sincerely,

Ken Powers
