DES

Docket Nos. 50-352
50-353

Mr. D. M. Smith
Senior Vice President-Nuclear
PECO Energy
Nuclear Group Headquarters
Correspondence Control Desk
P.O. Box 195
Wayne, Pennsylvania 19087-0195

Dear Mr. Smith:

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-352/94-08 AND 50-353/94-08

This letter transmits the results of the resident safety inspection by Messrs. M. Perry, and T. Easlick, from February 23, through March 28, 1994, at the Limerick Generating Station, Limerick, Pennsylvania. The inspection focused on issues important to ensuring the public health and safety and consisted of observations of activities, reviews of documents and interviews with plant personnel. The results are documented in the enclosed report and were discussed with Mr. L. Hopkins of your staff at the conclusion of the inspection.

In general, activities were found to be conducted safely. Although a deficiency was identified with the control of housekeeping in one area, overall the control of housekeeping was found to be excellent. In particular, the closeout inspection of the Unit 1 drywell was found to be comprehensive, with very good management attention. Additionally, activities associated with the repair of the Unit 1 recirculation pump discharge valve were found to be well planned and controlled.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

ORIGINAL SIGNED BY
EDWARD C. WENZINGER

Edward C. Wenzinger, Chief
Projects Branch No. 2
Division of Reactor Projects
