MEMORANDUM FOR: Docket File No. 40-4492
FROM: Dana C. Ward, Project Manager
SUBJECT: REVIEW OF LAND USE SURVEY FOR GAS HILL'S MILL, 1990

By letter dated October 11, 1990, American Nuclear Corporation (ANC) submitted the results of the annual land use survey for the area within five miles of the project area. The staff review of the licensee's submittal indicates the following major points:

1. Cattle grazing continues in the vicinity of the former mill site.
2. No new private residences within the 5 mile radius. The only existing ranch within the 5 mile radius is vacant.
3. The only functioning well within 5 miles of the project area continues to be at Pathfinder's Lucky Mc Mill.
4. Hunting is the only recreation within the 5 mile radius.

No significant changes to the land use have occurred since the last review. The staff concludes that ANC has performed an acceptable land use survey as required by License Condition No. 27 of Source Material License SUA-667. No further action is necessary at this time.
