## OFFICE MEMORANDUM

CPSES-9025642  
TUS-90431  
November 7, 1990

Response Required

TO: Technical Specifications Copy Holders

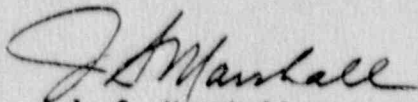

SUBJECT: Amendment 2 to the CPSES Unit 1 Technical Specifications

REFERENCE: Letter from J. W. Clifford to W. J. Cahill, Jr. dated November 6, 1990 transmitting CPSES Unit 1 - Amendment No. 2 to Facility Operating License No. NFP-87

Attached is a copy of Amendment 2 to the CPSES Unit 1 Technical Specifications. These specifications are effective immediately. Please insert these specifications into your controlled copy as per the attached instructions.

The changes modify Technical Specifications tables 2.2-1 and 3.3-3 to permit use of the panel front-installed analog meter for calibration of High and Low setpoints for power range neutron flux meters and correct a bias in the steam generator water level Low-Low and High-High setpoints.

If you should have questions, please call Jimmy Seawright or Jose D. Rodriguez at (214) 812-4375 or (214) 812-8674 respectively.
