United States Nuclear Regulatory Commission  
Region IV  
Uranium Recovery Field Office  
Box 25325  
Denver, Colorado 80225

Dear Mr. Hall:

Re: Organizational Change - White Mesa Mill

As of October 1, 1990, Don Sparling has retired as the Manager of the White Mesa Mill. The following organizational changes are effective immediately to insure continuity of the operation.

G. G. Ray, in his role as Production Superintendent for the White Mesa Mill will now have responsibility for not only mill operations, but also day to day activities in the laboratory, metallurgical, warehouse, and purchasing departments. In addition to these duties, Jerry will also manage the activities of the office staff and will be responsible for coordination and interface with Earl Shortridge's Technology Department. In this capacity, Jerry will report directly to me.

W. W. Brice, in addition to his maintenance responsibilities as Maintenance Superintendent for the White Mesa Mill, will coordinate compliance activities at White Mesa. In order to facilitate this, the Safety, Radiation and Environmental departments will report directly to Butch. In this capacity, Butch will report directly to me.

Attached is an updated organizational chart for the White Mesa Mill.

R. A. Van Horn  
Director of Operations
