Birmingham, AL 35201

SAFEGUARDS INFORMATION REMOVED

Gentlemen:

SUBJECT: DOCKET NOS.: 50-348 AND 50-364

Revision 18 to the Joseph M. Farley Nuclear Plant Physical Security Plan was transferred by this office to the Office of Nuclear Reactor Regulation for review as discussed in our letter to you dated July 11, 1990. NRR has completed their review. The enclosure to this letter identifies areas of the plan which are either not consistent with the provisions of 10 CFR 50.54(p) or require additional clarification.

Because of the extensive number of comments and the administrative manner in which the revision was formatted it is requested that a representative from the site who is responsible for the plan content arrange to meet in our office with members of the security staff to discuss the areas of concern. We feel that a meeting will be beneficial in communicating and clarifying the problems encountered with the format of Revision 18.

Our concerns were discussed with Mr. L. Enfinger of your staff and Ms. C. Perny of this office on October 11, 1990.

As mentioned above, the enclosure identifies both changes which need additional clarification and changes which are not consistent with regulatory requirements. To preclude a violation of regulatory requirements, you must not continue to implement those changes deemed inconsistent. Please revert to the commitments in your previously approved plan or, should you want to pursue those changes deemed inconsistent, you must submit a request to the Commission's Office of Nuclear Reactor Regulation under the provisions of 10 CFR 50.90.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the enclosure will not be placed in the Public Document Room.
