License No. 50-13648-01

Fairbanks Memorial Hospital

Attention: Mr. Tom Mingen
Administrator

Gentlemen:

Subject: NRC Inspection

This refers to the routine safety inspection conducted by Ms. B. Riedlinger of this office on September 2 and 3, 1982 of activities authorized by NRC License No. 50-13648-01 and to the discussion of our findings held by Ms. Riedlinger with you and other members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations by the inspector.

During this inspection, it was found that certain of your activities appeared to be in noncompliance with NRC requirements. The items and references to the pertinent requirements are listed in the enclosure to this letter. These items have been categorized into levels as described in the NRC Enforcement Policy (10 CFR Part 2, Appendix C), 47 FR 9987 (March 9, 1982).

The findings from this inspection, as well as the one conducted on September 19, 1979 indicate a repetitive item of noncompliance (see Appendix A, Item E).

We are concerned about the repetitive nature of the items of noncompliance observed during our inspections. In addition to the need for corrective action regarding the specific items of noncompliance included in Appendix A, we are concerned about the implementation of your management control system that allowed an item of noncompliance to recur. Consequently, in your reply you should describe in particular those actions taken or planned to improve the effectiveness of your overall management control system.
