Haddam Neck Plant
Additional Information for SEP Topic III-1
Quality Group Classification of Components and Systems

In a letter dated January 27, 1993,⁽¹⁾ Connecticut Yankee Atomic Power Company (CYAPCO) responded to eight questions that were raised in the NRC Staff's Safety Evaluation Report on Systematic Evaluation Program (SEP) Topic III-1⁽²⁾. Following the submittal of the information, the NRC Staff requested that additional clarification be provided and conclusions drawn regarding comparison of original plant design criteria against the design requirements of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, Section III, 1977 Edition, Summer 1978 Addenda.

The attachment to this letter provides the Staff with the additional information requested. CYAPCO considers the information provided to be sufficient to close SEP Topic III-1.
