ATTN: Art High  
Route #1, Box 485AA  
Bonners Ferry, Idaho 83805

SUBJECT: NRC INSPECTION REPORT 030-32271/94-01

This refers to the special, announced inspection conducted by Mr. Robert A. Brown of this office on March 17, 1994. The inspection included a review of activities authorized by Byproduct Materials License IDA-234. At the conclusion of the inspection, the findings were discussed with you.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observation of activities in progress.

The inspector determined that you possess one portable moisture/density gauge which is maintained in a locked storage shed on your property near Bonners Ferry, Idaho. You stated this gauge has not been used in several years. You stated to the inspector that you plan to sell the gauge and terminate your license. The inspector provided you with the names of several licensees in your area who are licensed to possess model gauge you possess. Please notify this office when you transfer your gauge so that we may terminate your license.

No violations or deviations were identified; therefore, no response to this letter is required.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room.
