SUBJECT: NRC INSPECTION REPORT 50-445/94-08; 50-446/94-08

This refers to the inspection conducted by Dr. J. B. Nicholas of this office during the period March 21-25, 1994. The inspection included a review of activities authorized for Comanche Peak Steam Electric Station, Units 1 and 2. At the conclusion of the inspection, the findings were discussed with Mr. C. L. Terry and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. These included the solid radioactive waste management and transportation of radioactive materials programs. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress.

Your staff identified that the manifest for a shipment of radioactive waste shipped on January 20, 1993, did not correctly identify the physical description of all of the waste. This violation is not being cited because the criteria in paragraph VIII.B.2 of Appendix C to 10 CFR Part 2 of the NRC's "Rules of Practice," were satisfied. Your staff took prompt and effective corrective actions to correct the problem.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Samuel J. Collins, Director
Division of Radiation Safety
and Safeguards
