## SUMMARY

### Scope:

This routine, announced inspection was conducted in the areas of the Physical Security Program for Power Reactors. Specifically, the areas of management support; physical barriers; and vehicle threat contingency.

### Results:

In the areas inspected, violations or deviations were not identified. The licensee's security program was determined to be effective in providing an acceptable level of protection for the nuclear station's resources and the design threat of radiological sabotage. The performance of the security force was reflected in their professionalism in carrying out their operational duties.
