Ms. Elaine Hemby
U.S. Nuclear Regulatory Commission
Export Licensing
7735 Old Georgetown Road
Bethesda, Maryland 20014

Dear Ms. Hemby:

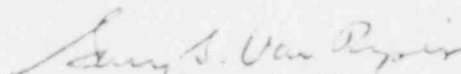

Reference is made to NRC License Nos. XMO8537 and XMO8543, which concern earlier shipments of tin concentrate (containing Natural Uranium and Natural Thorium) to Capper Pass and Son Limited, Yorkshire, England. With this letter I am returning license XMO8537 in that it represents the completion of shipments provided therein.

Accompanying is a new license application concerning the shipment of an additional thirty-five (35) metric tons of similar tin concentrate to the same consignee - Capper Pass and Son Limited. This concentrate will be available for shipment on October 15, 1982. We will greatly appreciate your expediting the issuance of this license.

We anticipate the generation of additional tin concentrate during the latter part of 1982 and 1983. When this additional material is in hand and ready to be shipped, you will be contacted relative to the issuance of the required export license.

Thank you for your assistance in this matter and please call if you need any further information.

Sincerely,

Gary G. Van Riper
Deputy Director,
Environmental Control
