SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit No. 1; Docket No. 50-317
Withdrawal of Request for Enforcement Discretion

REFERENCE: (a) Letter from C. H. Cruse (BG&E) to T. T. Martin (NRC), dated August 27, 1993, Request for Enforcement Discretion; Calvert Cliffs Unit 1

The referenced letter from Baltimore Gas and Electric Company requested enforcement discretion of Calvert Cliffs Unit 1 Technical Specification 3.7.6.1, "Control Room Emergency Ventilation System." In discussions held with the Nuclear Regulatory Commission Staff on August 27, the Nuclear Regulatory Commission agreed to grant enforcement discretion, assuming the information in the letter remained valid, if Unit 1 encountered conditions which would lead to a plant shutdown. Such conditions did not arise and the circumstances leading to the request have been eliminated without Baltimore Gas and Electric Company requesting the enforcement discretion. Therefore, we withdraw our request.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

RED/BDM/bdm/bjd
