General Comment

I am interested in seeing how fast these reviews and licenses can be issued as the agency moves closer toward rubber stamping what ever the industry and commission politics want. Maybe they can shoot for 24 hours or 1 week for a metric goal. The agency being viewed as the "gold standard" in the world was due to careful reviews and intentional processes and procedures to minimize significant risks to the public. As that changes to get faster to save the industry more money, that standard will change also.

Less budget = Less staff = Less reviews/inspections = Less findings/violations/issues = Less complaints from the industry = Happy Commission = Happy Senior Managers with larger performances bonuses (NRC/Industry)
