

April 14, 1994

LICENSEE: Northern States Power Company
FACILITY: Prairie Island Nuclear Generating Plant
SUBJECT: INSERVICE TESTING PROGRAM MEETING SUMMARY

A meeting was held at NRC Headquarters on April 12, 1994, to discuss Prairie Island's Inservice Testing (IST) Program. Enclosure 1 provides a list of attendees. Enclosure 2 provides the licensee's agenda.

By letters dated June 16, 1993, and August 25, 1993, Northern States Power (NSP) submitted its Third 10-Year IST Program for the Prairie Island Nuclear Generating Plant. The staff reviewed the program and provided the results of the review in a safety evaluation dated December 8, 1993. On December 22, 1993, NSP submitted additional relief requests for Prairie Island. The staff reviewed the additional requests for relief and provided the results of the review in a safety evaluation dated March 15, 1994. Both the December 8, 1993, and the March 15, 1994, safety evaluations required the licensee to respond to the NRC within 1 year of the date of the safety evaluation to describe actions taken to address concerns identified in the evaluation and to submit revised relief requests, if necessary. NSP requested a meeting to discuss its follow-up actions to address the issues identified in both safety evaluations.

During the meeting, the licensee gave an update of the status of its Third 10-Year Program. Each relief request that had been granted interim approval was discussed. During this discussion, testing scope and associated risks were addressed. In addition, all valve testing deferral evaluations that did not provide adequate justification were also discussed.

No new commitments were made at the meeting. NSP plans on making one submittal that will address all open items identified in the December 8, 1993, and March 15, 1994, safety evaluations sometime this fall.
