Perry Nuclear Power Plant
Docket No. 50-440
Operating License Amendment Request -
Addition of Centerior Service
Company as a PNPP Licensee

Gentlemen:

Enclosed is a supplement to a previously proposed request for amendment to the Perry Nuclear Power Plant (PNPP), Unit 1 Facility Operating License NPF-58. The original request was submitted by letter dated July 17, 1990 (PY-CEI/NRR-1189L), which requested the addition of Centerior Service Company as a licensee to the PNPP Operating License.

This proposed supplement to our previous submittal incorporates an additional paragraph into the License, regarding Centerior Service Company compliance with the antitrust provisions of the License. It is proposed that Section 2.C.(3) be revised by identifying the existing paragraph as Section 2.C.(3)a, and adding a new Section 2.C.(3)b as follows:

Centerior Service Company (CSC) shall comply with the antitrust conditions delineated in Appendix C to this license as if named therein. CEICO is responsible and accountable for the actions of CSC to the extent that CSC's actions contravene the antitrust license conditions in Appendix C to this license.

We have reviewed the proposed change and concluded that the Significant Hazard and Environmental Considerations for our original License Amendment Request remain valid and are applicable to this supplement. Therefore, no revisions to the Considerations in the original application are warranted. If there are any questions, please feel free to call.

Sincerely,

Fred J. Lange, Jr.
