

APPENDIX A

NOTICE OF VIOLATION

Wolf Creek Nuclear Operating Corporation
Burlington, Kansas

Docket: 50-482
License: NPF-42

During an NRC inspection conducted February 14-24, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Criterion V, "Instructions, Procedures, and Drawings," of Appendix B to 10 CFR Part 50 states in part, "Activities affecting quality shall be prescribed by documented instructions, procedures, or drawings, of a type appropriate to the circumstances and shall be accomplished in accordance with these instructions, procedures, or drawings." Wolf Creek Procedure ADM 02-102, "Control of Locked Component Status," Revision 27, Section 5.0, requires that drawings (P&IDs) be revised to reflect changes to locked valves, breakers, or component lists.

Contrary to the above, on February 22, 1994, Drawings M-12EG03(Q), "Component Cooling Water System, R00," and M-12BL01(Q), "Reactor Makeup Water System, R04," had not been revised since July 29, 1993, to reflect changes to the locked valve list for Valves EG-V089 and BL-V005, respectively. This discrepancy was identified in Performance Improvement Request 93-1203, dated October 27, 1993.

This is a Severity Level IV violation (482/9402-01) (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, Wolf Creek Nuclear Operating Corporation is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Arlington, Texas
this 15 day of April 1994
