

U.S. NUCLEAR REGULATORY COMMISSION

REGION V

Report No. 50-397/82-22

Docket No. 50-397 License No. CPPR-93 Safeguards Group _____

Licensee: Washington Public Power Supply System

P. O. Box 968

Richland, Washington 99352

Facility Name: Washington Nuclear Project No. 2 (WNP-2)

Inspection at: WNP-2 Site, Benton County, Washington

Inspection conducted: August 30 - September 3, 1982

Inspectors: *Dennis J. Willett* 9-27-82
D. J. Willett, Reactor Inspector Date Signed

Approved by: *R J Dodds* 9/27/82
Robert Dodds, Chief, Reactor Projects Date Signed
Section 1, Reactor Projects Branch 1

Summary:

Inspection on August 30 - September 3, 1982 (Report No. 50-397/82-22)

Areas Inspected: Routine, unannounced inspection of facility organization; preoperational testing; Operational Quality Assurance Program and independent inspection. The inspection involved 18 onsite hours by one NRC inspector.

Results: Of the four areas inspected, no items of noncompliance or deviations were identified.

DETAILS

1. Persons Contacted

- J. D. Martin, Plant Manager
- *J. F. Peters, Plant Administrative Supervisor
- G. K. Afflerbach, Manager-Startup
- *D. H. Walker, Plant Quality Assurance/Quality Control (QA/QC) Manager
- J. M. Graziani, Operations Quality Assurance Supervisor
- *K. D. Kowan, Technical Manager

The inspector also talked with other licensee personnel, including startup test engineers.

*Denotes persons present at the exit interview.

2. Organization

The organization, structure and personnel responsibility for the operation and administration of WNP-2 has changed from that previously reported. R. B. Glasscock was appointed Director, Licensing and Assurance (August 10, 1982). In addition to the previous assigned quality assurance function, Mr. Glasscock will be responsible for Nuclear Safety and Licensing. R. G. Graybeal, Manager of Health Physics/Chemistry, reports directly to J. D. Martin, WNP-2 Plant Manager, as of August 10, 1982.

No items of noncompliance or deviations were identified.

3. Operational Quality Assurance/Quality Control

The inspector reviewed the Operational Quality Assurance Program. This examination included a review of: Quality Assurance/Quality Control (QA/QC) Program Manual; Corporate Quality Assurance Program; training records of onsite QA/QC personnel; corporate audit schedule; FSAR, Chapters 13 and 17; and Safety Evaluation Report (NUREG 0892). The inspector's review included discussions with supervisors and personnel responsible for program implementation.

No items of noncompliance or deviations were identified.

4. Preoperational Testing

The inspector reviewed selected documentation associated with the preoperational test program. This review included discussions with test supervisors and personnel regarding the status, the conduct of testing, and the schedule of the test program.

No items of noncompliance or deviations were identified.

5. Independent Inspection

The inspector walked through areas of the plant to: observe activities in progress; inspect the general state of housekeeping and fire protection; and monitor the status of system completion.

No items of noncompliance or deviations were identified.

6. Exit Interview

The inspector met with licensee representatives (denoted in paragraph 1) at the conclusion of the inspection on September 3, 1982. The scope and findings of the inspection were discussed and are summarized as set forth in Paragraph 2 through 5.
