Grayling, MI 49738

License No. 21-16489-01
Docket No. 030-11125

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. B. A. Parker and K. E. Andre of this office on November 16, 1990, of activities authorized by NRC Byproduct Material License No. 21-16489-01, and to the discussion of our findings with Ms. Gwen Summers at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they pertain to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appear to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

Violation No. 1 is a repeat item. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action specified in the Form NRC-591 provided to you during our last inspection on August 27, 1987.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Roy J. Caniano, Chief
Nuclear Materials Safety
