Ivan Selin, Chairman  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Chairman Selin,

The earth is the home of millions and millions of people. As you are the chairman of the Nuclear Regulatory Commission, I believe you realize that as earth's inhabitants, it is our job to protect it.

One of our jobs is to stop the Louisiana Energy services from building a factory near Homer, Louisiana. The LES plant will not only produce surplus enriched uranium, but it will also produce 4,000 tons of radioactive uranium-238 waste. Many residents of Forest Grove and Center Springs are concerned that this waste will be very hazardous to their health. Especially if the waste water from the plant flows indirectly into Lake Claiborne's watershed, or if the dangerous waste is stored at the plant, which is within a mile of homes and schools of Forest Grove and Center Springs.

I ask of you to please talk to the people of Forest Grove and Center Springs. If you are not waywarded by an outsider, maybe the men, women, and children of Forest Grove and Center Springs will convince you to vote against the plant.

Sincerely yours,  
Cara Grider, age 15
