November 19, 1990

Gentlemen:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Technical Specification Change Request No. 195

Pursuant to 10CFR50.90, GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station, requests a change to Appendix A of its Operating License.

Technical Specification Table 4.1.1 is requested to be revised to include surveillance intervals which are correct for analog instruments and to extend a digital surveillance test interval based on switch performance data. The existing intervals describe acceptable time limits for the previous digital switch sensors which have been replaced. Also, a correction to the bases for Technical Specification 3.1 is submitted. An error has been identified which incorrectly describes the control features of the High Drywell Pressure Trip System. NRC approval for changes to the bases for the Technical Specification is not required. This letter serves as docketed notification of the requisite correction.

If there are any questions, please call Mr. John Rogers, Licensing Engineer at (609) 971-4893.

Very truly yours,

E.E. Fitzpatrick  
Vice President and Director  
Oyster Creek
