RECEIVED

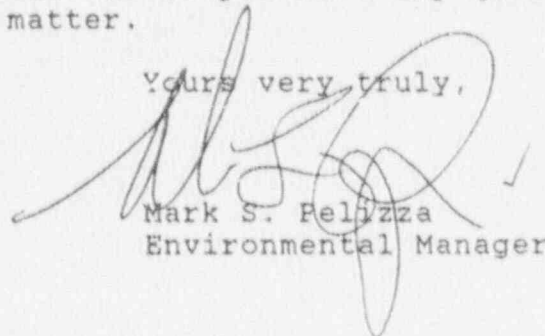

Dear Mr. Hall:

Pursuant to your request, attached are the Uranium Resources, Inc (URI) comments pertaining to the NRC's interim position regarding on-site disposal.

Please note that these comments were written before our meeting on October 26, 1990, where you clarified some of the NRC's position; and these comments would have been somewhat different based on your clarification. Presently, it is my understanding that URI could license on-site disposal if three or more *in situ* operators agreed to dispose of byproduct at that site. Also, based on our meeting it is my understanding that the site characterization of temporary sites dealt primarily with land status examination to determine if permanent disposal will be possible in that the property can be deeded to the NRC.

Please feel free to contact me if you have any questions or comments pertaining to this matter.

Yours very truly,

Mark S. Pelizza
Environmental Manager
