

Docket No. 30-11586

OCT 5 1982

License No. 08-16752-01

Hadley Memorial Hospital
ATTN: Mr. James Suzuki
Administrator
4601 Martin Luther King Avenue, SW
Washington, D.C. 20032

Gentlemen:

Subject: Inspection No. 82-01

This refers to the routine safety inspection conducted by Mrs. Teresa Hall Darden of this office on August 17, 1982, of activities authorized by NRC License No. 08-16752-01 and to the discussions of our findings held by Mrs. Darden with Mr. Leonard Harris and Mrs. J. O'Neil of your staff at the conclusion of the inspection, and to a subsequent telephone discussion between Mrs. Darden and Mr. John Davis on September 9, 1982.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Our inspector also verified the steps you have taken to correct the violation brought to your attention in the enclosure to our letter dated October 29, 1980. We have no further questions regarding your action at this time.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. These violations have been categorized by severity level in accordance with the NRC Enforcement policy (10 CFR 2, Appendix C) published in the Federal Register Notice (47 FR 9987) dated March 9, 1982. You are required to respond to this letter; and, in preparing your response, you should follow the instructions in Appendix A.

From the discussions conducted during the inspection, it is our understanding that your plan to inform the U.S. Nuclear Regulatory Commission, Region I, Material Program Section No.2, 631 Park Avenue, King of Prussia, Pennsylvania 19406, of the dates that you ceased operations in the old Nuclear Medicine Department and began operations in the new one. You should perform a survey of your old facility to assure that it meets the enclosed "Guidelines for Decontamination of Facilities and Equipment." We further understand that you will submit to this office the results of your calculations of the extremity exposure received by one of your technologists on July 30, 1982. Please confirm our understandings in your reply to this letter.

OCT 5 1982

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and your reply will be placed in the Public Document Room.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
John D. Kinneman
