NOTICE OF VIOLATION

Hadley Memorial Hospital  
Washington, D.C. 20032

Docket No. 30-11586  
License No. 08-16752-01

As a result of the inspection conducted on August 17, 1982, and in accordance with the NRC Enforcement Policy (10 CFR 2, Appendix C), the following violations were identified:

- A. Condition 17 of License No. 08-16752-01 requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in application dated December 10, 1980, and letter dated June 5, 1981.

Item 10 of this application requires that dose calibrators be calibrated in accordance with procedures contained in Appendix D, Section 2, of Regulatory Guide 10.8.

Item A.1 of Appendix D, Section 2, requires that the dose calibrator linearity be determined at installation and quarterly thereafter.

Contrary to the above, as of August 17, 1982, dose calibrator linearity had not been determined quarterly.

This is a Severity Level IV violation (Supplement V).

- B. 10 CFR 20.203(f)(4) requires that, prior to disposal of an empty, uncontaminated container to an unrestricted area, the radioactive label be removed or defaced, or the container be marked as empty.

Contrary to the above, on August 17, 1982, boxes labeled as containing medical radioisotopes were disposed of without removing, defacing, or marking the labels.

This is a Severity Level V violation (Supplement IV).

- C. 10 CFR 20.401(b) requires that each licensee maintain records showing the results of surveys required by 10 CFR 20.201(b).

Contrary to the above, as of August 17, 1982, records were not maintained of those surveys performed to assure compliance with 10 CFR 20.301, which describes authorized means of disposing of radioactive waste, nor of contamination and radiation surveys performed within the Nuclear Medicine Department.
