SUMMARY

Scope:

This routine, announced inspection was conducted in the area of the Physical Security Program for Power Reactors. The inspector reviewed Barriers (Protected and Vital Areas), Alarms (Protected and Vital Areas), Assessment and Audits (including Safeguard Event Logs).

Results:

In the areas inspected, violations or deviations were not identified, except for a non-cited licensee identified violation resulting from an event which occurred on March 10, 1994, relative to vital area barriers. Assessment capabilities and barriers have significantly improved. Audits appeared to be adequate, and no abnormality was noted in a review of the Safeguards Event Logs.
