LICENSED OPERATOR REQUALIFICATION EXAMINATION SCHEDULE

Gentlemen:

On April 30, 1990, the NRC and the Brunswick Plant conducted Licensed Operator Requalification (LOR) examinations of twenty Brunswick operators in accordance with NUREG 1021, Operator Licensing Examiner Standards. These examinations resulted in the LOR program at Brunswick being determined unsatisfactory. Subsequently, extensive retraining was conducted and additional NRC administered Operational Evaluations were performed.

Carolina Power & Light Company's (CP&L) preliminary LOR summation schedule, presented in a meeting with the NRC on August 15, 1990, provided for NRC reexamination of the Brunswick LOR Program in April 1991. Additional training needs emerging from the LOR failures and additional testing to support simulator certification have necessitated that more time be allocated before the program is reexamined. CP&L requests that NRC administered examinations be conducted on the following schedule.

Exam Preparation	May 27, 1991
Hot License (4 RO - 5 SRO)	June 3, 1991
LOR (8-12 Operators)	June 10, 1991
LOR (8-12 Operators)	June 24, 1991

This schedule has been discussed with, and is tentatively acceptable to, members of the NRC Region II Training Staff.

Please refer any questions regarding this submittal to Mr. Robert Poulk, Manager - License Training Brunswick at (919) 457-2314.

Yours very truly,

G. E. Vaughn
