

November 29, 1990

Donald F. Schnell
Senior Vice President
Nuclear

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Mail Station P1-137
Washington, D.C. 20555

Gentlemen:

ULNRC-2330

DOCKET NUMBER 50-482
CALLAWAY PLANT
PROGRAMMED ENHANCEMENTS FOR GENERIC LETTER 88-17,
"LOSS OF DECAY HEAT REMOVAL" FOR CALLAWAY PLANT
(TAC NO. 69729)

Reference: 1) ULNRC-1900, dated February 1, 1989
2) NRC Letter to D. F. Schnell dated
July 25, 1990

The referenced NRC Letter to D. F. Schnell requested that Union Electric inform the NRC in writing when actions and modification described in ULNRC-1900 were implemented and operational.

In ULNRC-1900, Union Electric committed to provide two independent RCS level indications in the Control room. During our recently completed refuel outage, existing level indication equipment was replaced with an upgraded system, and an additional independent system was added. These hardware-related modifications are now complete. Correct operation of both systems was verified following installation. Since these systems function only during plant shutdown, our next use of the systems is anticipated during the refuel outage scheduled for Spring, 1992.

If additional information is required, please contact Mr. D. E. Shafer of my staff.

Very truly yours,

Donald F. Schnell
