The enclosed information is being submitted in connection with the commitments made by Westinghouse in WCAP-8587, "Methodology for Qualifying Westinghouse WRD Supplied Safety Related Electrical Equipment." The generic qualification program described in WCAP-8587 is in accordance with Regulatory Guide 1.89 (IEEE 323-1974) and 1.100 (IEEE 344-1975). It is referenced by a number of plants in Sections 3.10 and 3.11 of the FSAR.

These documents contain proprietary information of Westinghouse Electric Corporation. In conformance with the requirements of 10CFR Section 2.790, as amended, of the Commission's regulations, we are enclosing with this submittal an application for withholding from public disclosure and an affidavit. The affidavit sets forth the basis on which the information may be withheld from public disclosure by the Commission.

Correspondence with respect to the affidavit or application for withholding should reference AW-82-60 and should be addressed to R. A. Wiesemann, Manager of Regulatory and Legislative Affairs, Westinghouse Electric Corporation, P.O. Box 355, Pittsburgh, Pennsylvania 15230.

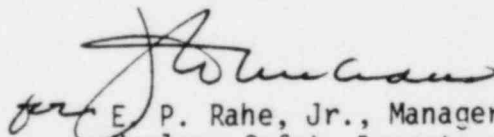

By carbon copy of this letter, we are sending two (2) additional copies of all of the reports listed above. One copy to Mr. Paul Shemanski of the NRC Equipment Qualification Branch and one (1) copy to Mr. Richard Borgen of EG&G Idaho. This is being done to provide the necessary documentation which will permit EG&G Idaho to continue their review of the Westinghouse program as agreed at our meeting on January 8, 1982, at the NRC with Mr. Shemanski and members of EG&G Idaho staff.

Table 1 summarizes those Westinghouse programs that have been completed and for which the qualification documentation has been reviewed and accepted by the working group which represents a group of utilities who are referencing WCAP-8587 for qualification purposes. These utilities are known as the "Westinghouse Users Group". With this submittal, the NRC now has all of this information. Table 2 summarizes the status of other Westinghouse ongoing qualification programs which we expect to be completed in the near term.

At your earliest convenience, we would appreciate an estimate from you of the completion date for your review of this material. If a meeting with Westinghouse, or any other support we can give, would help you with this review, please do not hesitate to contact myself, George Butterworth (412) 373-5761, or Alex Ball (412) 373-5792 of my staff.

Very truly yours,

WESTINGHOUSE ELECTRIC CORPORATION
