

Docket No. 50-346

License No. NPF-3

Serial No. 867

October 19, 1982

RICHARD P. CROUSE
Vice President
Nuclear
(419) 259-5221

Mr. T. M. Novak, Assistant
Director for Operating Reactors
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Novak:

This is in response to your letter dated July 13, 1982 (Log No. 1029) relating to modifications to ECCS evaluation models as a result of the resolution of NUREG-0630 issues as pertaining to the Davis-Besse Nuclear Power Station, Unit 1. Your letter requested an implementation schedule for these modifications to the ECCS evaluation models. As you are aware, activities for NUREG-0737, Item II.K.3.30 (Revisions to Small Break LOCA Methods to Show Compliance with 10CFR50, Appendix K) are currently progressing. Following the completion and NRC approval of Item II.K.3.30, an implementation schedule for NUREG-0737, Item II.K.3.31 (Plant Specific Calculations to Show Compliance with 10CFR Part 50.46) will be developed. The permanent modifications to the ECCS evaluation models will be undertaken as an extension of the II.K.3.31 activities. Toledo Edison will provide the implementation schedule for these modifications 60 days after the NRC approval of II.K.3.30 activities.

Very truly yours,

R P Crouse
