License No. 34-12436-02
Docket No. 030-11674

Dear Mr. Palin:

This refers to a telephone contact conducted on April 5, 1994. The purpose of the contact was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The contact consisted of discussions between Tom Wilson of your staff and Bob Gattone of my staff.

As a result of this examination of activities, regulatory concerns were noted and are specified below. They may be evaluated at an onsite inspection at your facility in the near future.

As discussed with Tom Wilson, the following apparent regulatory concerns were identified:

1. Stanley Eng has been replaced by Wayne Miller as the only authorized user. However, the license (reference Condition 11.) has not been amended to reflect this change.

You should examine your license and NRC regulations to determine how you can correct the apparent regulatory concerns that you discussed on the telephone. Please submit to this office, within 30 days of the date of this letter, a description of actions taken or those that will be taken to correct the above mentioned regulatory concerns. In addition, we would like to highlight the following items to which you, as a licensee, should pay particular attention:

- a. Maintaining awareness and control of licensed material.
- b. Properly transferring and disposing of radioactive sources.
- c. Promptly reporting losses or thefts of licensed materials.
