Gentlemen:

This refers to your letter dated September 27, 1990, which was submitted in response to our September 4, 1990 Confirmatory Action Letter (CAL). In your response you submitted a description of your basis for having confidence that the responsibilities of the Radiation Safety Officer are and will be properly carried out and for ensuring that all licensed activities are conducted in accordance with NRC requirements, including your license conditions. In addition, you submitted a request for an amendment to your NRC license to include: (a) the procedures presented at the enforcement conference, (b) a procedure to check license possession limits against gauges to be ordered to ensure the possession limits are not exceeded, and (c) a procedure to ensure that unqualified individuals are not operating moisture/density gauges.

We have carefully reviewed your response and have amended your license to incorporate these changes. We have no further questions regarding your response to the CAL and consider the matters addressed in the CAL closed.

Sincerely,

Original signed by
