JUN 28 1982

Tennessee Valley Authority  
ATTN: Mr. H. G. Parris  
Manager of Power  
500A Chestnut Street Tower II  
Chattanooga, TN 37401

Gentlemen:

Subject: Report Nos. 50-438/82-17 and 50-439/82-17

This refers to the routine safety inspection conducted by Mr. M. D. Hunt of this office on June 7-10, 1982, of activities authorized by NRC Construction Permit Nos. CPPR-122 and CPPR-123 for the Bellefonte facility. Our preliminary findings were discussed with Mr. W. R. Dahnke, Project Manager, at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

During the inspection it was found that certain activities under your license appear to violate NRC requirements. This item and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Corrective actions to prevent recurrence were completed prior to the conclusion of this inspection; therefore, a reply is not requested.

One new unresolved item is identified in the enclosed inspection report. This item will be examined during subsequent inspections.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC's Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

F. J. Long, Chief  
Reactor Projects Branch 1  
Division of Project and  
Resident Programs
