

December 5, 1990

Mr. Donald C. Shelton
Vice President - Nuclear
Toledo Edison Company
Edison Plaza - Stop 712
300 Madison Ave
Toledo, Ohio 43652

Dear Mr. Shelton:

SUBJECT: GENERIC LETTER 83-28 ITEM 1.2, POST-TRIP REVIEW - DATA AND
INFORMATION CAPABILITY (TAC NO. M53582)

The NRC staff has completed its evaluation of the response by Toledo Edison Company to Generic Letter 83-28 Item 1.2, post-trip review program data and information capability for Davis-Besse Nuclear Power Station Unit 1 (DBNPS). The evaluation was performed in accordance with the review guidelines developed incorporating the best features from the initial utility responses to Item 1.2 of Generic Letter 83-28. These guidelines ensure that the licensee has the capability to record and display key plant data at proper time intervals for diagnosing causes of unscheduled reactor shutdowns and verifying proper safety equipment functions. Based on its review, the staff finds that the post-trip review program's data and information capabilities at DBNPS are acceptable for Action Item 1.2 of Generic Letter 83-28.

The staff's safety evaluation summarizing its review is enclosed.

Sincerely,

original signed by

M. D. Lynch, Sr. Project Manager
Project Directorate III-3
Division of Reactor Projects - III,
IV, V and Special Projects
Office of Nuclear Reactor Regulation

Enclosure:
As stated
