Subject: Limerick Generating Station, Units 1 and 2
 Technical Specifications Change Requests 92-10-0 and 92-11-0
 Revised Technical Specifications Pages

Gentlemen:

By letters dated April 19, 1993, and May 6, 1993, PECO Energy Company submitted Technical Specifications Change Request (TSCR) Nos. 92-10-0 and 92-11-0, respectively, for Limerick Generating Station (LGS), Units 1 and 2, requesting changes to the LGS TS to extend the surveillance intervals and allowed outage times for containment isolation actuation instrumentation and other selected actuation instrumentation. The NRC is currently reviewing these proposed Technical Specifications (TS) changes, and has requested that we resubmit several TS pages previously submitted in TSCR Nos. 92-10-0 and 92-11-0 to incorporate changes resulting from recently issued TS amendments and to correct several typographical errors.

Therefore, we are resubmitting the following TS pages for TSCR Nos. 92-10-0 and 92-11-0 (Attachments 1 and 2, respectively) which have been revised to incorporate information from recently issued TS amendments and to correct typographical errors. This information is being submitted under affirmation, and the required affidavit is enclosed.
