LCR 89-15

United States Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Gentlemen:

SUPPLEMENT TO REQUEST FOR AMENDMENT
ADMINISTRATIVE CONTROLS TECHNICAL SPECIFICATIONS
HOPE CREEK GENERATING STATION
FACILITY OPERATING LICENSE NPF-57
DOCKET NO. 50-354

This letter supplements License Change Request (LCR) 89-15, which was submitted to the NRC via NLR-N89202, dated January 24, 1990. This submittal does not affect PSE&G's determination of No Significant Hazards Consideration for LCR 89-15.

LCR 89-15 proposed changes to the distribution requirements for SORC meeting minutes per Technical Specification 6.5.1.9. "Vice President - Nuclear Operations" was added to the required distribution in lieu of the "Vice President and Chief Nuclear Officer". PSE&G hereby requests that the aforementioned proposed change be withdrawn, and that the Vice President and Chief Nuclear Officer remain on the required distribution for SORC meeting minutes. This request is consistent with the Administrative Control Technical Specifications proposed for the Salem Generating Station.

Attachment 1 contains the revised affected Technical Specification page. The remainder of LCR 89-15 is unaffected. Should you have any questions or comments regarding this transmittal, do not hesitate to contact us.

Sincerely,

B. A. Freston
Manager - Licensing & Regulation
