611, Ryan Plaza Dr. Suite 1000
Arlington, TX 76011

Attn: Mr. Glen D. Brown-Chief: Technical
Program Branch

License: 35-13559-02E

Dear Mr. Glen:

This has reference to your letter dated April 1, 1982 regarding the release of Tritium storage area for unrestricted use.

We have taken a fresh survey of the area and have found the radiation levels to be higher than 1000 dpm/100 cm². It is therefore proposed to again decontaminate the area and take fresh test samples after effective decontamination is carried out under the directions of Mr. B. Wally Ahluwalia.

We agree to provide you with additional survey results following further decontamination. In the mean time the room previously used for Tritium is being kept under lock and key to prevent unauthorized entry and exits.

Thanking you,

Yours sincerely,

A handwritten signature in cursive script, appearing to read "Vijay K. Mehan".

Pauls Valley, OK 73075

Dear Mr. Mehan:

I have reviewed the letter dated March 29, 1982, from Nuclear Regulatory Commission Region IV related to the tritium contaminated area. Please convey to the regional NRC office that the decontamination will be performed under my direction, smear samples will be counted for tritium content. The decontamination procedure will be repeated if necessary. The final results of the smear tests will be filed with the Chief, Technical Program Branch, NRC Region IV, Arlington, Texas.

Sincerely yours,

B. Wally Ahluwalia, Ph.D.
