GENERAL OFFICE
P.O. BOX 499, COLUMBUS, NEBRASKA 68601-0499
TELEPHONE (402) 564-8561

October 18, 1982

Office of Nuclear Reactor Regulation
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Darrell G. Eisenhut, Director

Dear Mr. Eisenhut:

Subject: NUREG-0737, Items II.F.1-1, 2, Accident Monitoring
Instrumentation - Noble Gas and Iodine Particulate

- Reference:
- 1) Letter from D. G. Eisenhut to All Licensees dated March 17, 1982, Post-TMI Requirements (Generic Letter No. 82-05)
 - 2) Letter from J. M. Pilant to D. G. Eisenhut dated April 16, 1982, Generic Letter No. 82-05, Response
 - 3) Letter from J. M. Pilant to H. R. Denton dated January 11, 1980, Upgraded Emergency Plan

By Reference 1 you requested confirmation dates of certain Post-TMI Requirements. Reference 2 provided the information you requested. This letter is to update the status of the subject items.

Due to continuing vendor delays, the District has cancelled its original contract and has selected a new vendor. The District will complete installation and confirm operability of the new system by the completion of the Spring, 1983, outage, which is scheduled to begin in April, 1983. Compensatory sampling measures which were discussed in Reference 3 have been implemented and are considered adequate in the interim.

If you should require further clarification on this issue, please contact me.

Sincerely,

Jay M. Pilant
Division Manager of Licensing
and Quality Assurance
