Subject: Byron Station Units 1 and 2
Braidwood Station Units 1 and 2
Withdrawal of Application for Amendment to
Facility Operating Licenses NPF-37/66 and NPF-72/77
NRC Docket Nos. 50-454/455 and 456/457

Reference: a) March 6, 1989 letter from R. Chrzanowski
to Mr. D. Muller containing an application for
Amendment to Byron/Braidwood Facility
Operating Licenses

Dear Dr. Murley:

In reference (a), pursuant to 10 CFR 50.90, Commonwealth Edison Company (CECo) proposed to amend Appendix A, Technical Specifications of Facility Operating Licenses NPF-37/66 and NPF-72/77 for Byron and Braidwood Stations respectively. The proposed amendment was to effect changes to Technical Specifications 3/4.7.6, 3/4.7.7 and 3/4.9.12. A subsequent teleconference was held on June 15, 1989 between the NRC Staff and CECo personnel during which portions of the submittal were discussed. At the conclusion of the teleconference, CECo personnel stated they would re-evaluate the changes submitted.

As a result of re-evaluation, the scope of the changes and justification has changed enough from the original submittal to warrant withdrawal of our application for amendment of reference (a). It is expected that a submittal, similar in scope and containing a level of detail commensurate with present day expectations will be submitted at a later date.
