Bart D. Withers Vice President

OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

11

DOCKET NUMBER PR-50  
PENDING RULE  
(47 FR 35996)

October 5, 1982

Secretary of Commission  
ATTN: Docketing and Service Branch  
U. S. Nuclear Regulatory Commission  
Washington DC 20555

Dear Sir:

Codes and Standards

We have reviewed the proposed change to 10 CFR 50 that was published in the August 18, 1982 Federal Register, which would allow the waiver of the Technical Specifications during an emergency situation if it was necessary to protect the health and safety of the public. We agree with and encourage this approach since the protection of the public should always be given the highest priority. We have no further comments to offer at this time.

Sincerely yours,

Bart D. Withers  
Vice President  
Nuclear
