

April 21, 1994

Dr. V. J. Esposito
Westinghouse Electric Corporation
P.O. Box 158
Madison, PA 15663

SUBJECT: NRC STAFF VISIT TO WALTZ MILL SITE

Dear Dr. Esposito:

This letter follows up a telephone conversation of April 7, 1994 between Joe Donoghue of my staff and Mr. Pitterle discussing the possibility of an NRC staff visit to a Westinghouse Corporation facility. The objective of the visit is to allow staff members to examine a steam generator internals mockup and associated tube inspection and repair apparatus. Along with the hardware displays, the information imparted by your staff should do well to complement NRC staff understanding in the area of steam generator tube integrity.

I understand that May 18, 1994 may be a suitable date. At this point I expect five to ten individuals from the NRC staff to attend. The visit would be held as a closed meeting, since proprietary information and processes will be presented.

Please confirm the availability of your facility and staff for the proposed date. Also, please send a list of Westinghouse personnel expected to attend and appropriate information to support travel to your facility (including a map showing the facility location in relation to local lodging and airports). Contact Joe Donoghue (301-504-1131) with any questions or concerns.

Sincerely,

/s/

Timothy E. Collins, Acting Chief
Reactor Systems Branch
Division of Safety Systems & Analysis
