Gentlemen:

DOCKET NUMBER 50-483
CALLAWAY PLANT
SAFETY-RELATED MOTOR-OPERATED
VALVE TESTING AND SURVEILLANCE

Reference: NRC Generic Letter No. 89-10,
dated June 28, 1989

This letter supplements Callaway's Generic Letter 89-10 Close-Out submittal ULNRC-02964 to clarify our position by adding commitments as agreed during the conversation on April 19, 1994 with NRR and Region III.

Through a revision to our MOV program description, EDP-ZZ-01114, Callaway will continue to actively pursue additional valve specific data for those MOVs listed below in order to demonstrate the conservatism in the assumptions documented in Request For Resolution 8746, Revision I.

ALHV0034, 35 & 36	BBPV8702A & B
BBHV0013, 14 15 & 16	EJHV8701A & B
BBHV8000A & B	ENHV0001 & 7
	ENHV0006 & 12

This data will be pursued through the EPRI MOV Predictive Performance Program, the Midwest Engineering Managers Conference and other utility differential pressure (DP) test data. The results of this effort will be documented in an on-site engineering evaluation when complete.

April 21, 1994

Callaway will submit a letter following the spring 1995 refueling outage addressing the results of re-DP tests with regards to confirming the adequacy of margin to accommodate possible changes in DP requirements.

If you have any questions concerning this letter, please contact us.

Very truly yours,

A handwritten signature in cursive script that reads "Donald F. Schnell".
