Docket No. 40-9014  
SUA-1556, Amendment No. 1

Bingham Engineering  
ATTN: David K. Cline  
Environmental Engineer  
100 Lindberg Plaza 2  
5160 Wiley Post Way  
Salt Lake City, Utah 84116

Dear Mr. Cline:

We have completed our review of your request dated December 30, 1993, to terminate Source Material License SUA-1556. A Final Finding of No Significant Impact and Notice of Intent to Terminate SUA-1556 was published in the Federal Register, Volume 59, No. 17, on January 26, 1994. Because you have indicated Bingham Engineering received no byproduct material, a closeout inspection is not required.

The proposed amendment to Source Material License SUA-1556 is consistent with NRC guidance. Therefore, pursuant to Title 10 of the Code of Federal Regulations, Part 51, and in accordance with your submittal dated December 30, 1993, License Condition No. 4 of SUA-1556 is being revised to read as follows:

4. Terminated

The license is being reissued to incorporate the above revision. The effect of this amendment is to terminate Source Material License SUA-1556. In accordance with the categorical exclusion contained in paragraph (a) of 10 CFR 51.22, an environmental assessment is not required. Therefore, an environmental report as required by 10 CFR 51.60 (b)(2) is not necessary.

This license amendment was discussed between you and Cynthia Miller-Corbett of our staff on February 4, 1994. Please call Ms. Miller-Corbett if you have any questions concerning this licensing action.

Sincerely,

Ramon E. Hall  
Director
