Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-313/90-34; 50-368/90-34

This refers to the inspection conducted by Messrs. P. H. Harrell, R. P. Mullikin, and C. C. Warren, of this office, during November 5-9, 1990. The inspection included a review of activities authorized for your Arkansas Nuclear One, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

During this inspection, it was determined that your staff had made effective progress toward the implementation of comprehensive corrective actions for addressing the items identified in the NRC's diagnostic evaluation team inspection. In addition, it was also noted that the documentation provided by your staff, to address each item reviewed, was complete and well organized.

During this inspection, commitments were made by Mr. J. J. Fisicaro for upgrading Procedure 1000.125, "Business Plan," as listed below. The details of the commitments are provided in paragraph 2 of the enclosed report.

- o Provide guidance to personnel on the acceptable methods of capturing NRC commitments in procedures.
- o Establish an effectiveness review program to evaluate the results of the actions taken by your staff to address the items identified by the diagnostic evaluation team.

If your understanding of these commitments differ from ours, please notify me immediately.
