Attention: Mr. D. R. Keuter, Assistant General Manager
Nuclear

Gentlemen:

Subject: NRC Inspection of Rancho Seco

This refers to the routine inspection conducted by Mr. C. Myers of this office on September 29 through November 9, 1990 and of activities authorized by NRC License No. DPR-54, and to the discussion of our findings held with Mr. J. Shetler, of your staff, at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

No violations of NRC requirements were identified within the scope of this inspection. However, an issue involving a failure to adhere to appropriate procedures for the modification of controlled plant configurations is discussed in the inspection report. Continued attention in this area is necessary to ensure configuration control is maintained for systems at Rancho Seco.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

Edward L. Wagner
