Docket No. WM-67

MAR 14 1994

U.S. Department of Energy
Albuquerque Operations Office
ATTN: Albert R. Chernoff
Project Manager
P.O. Box 5400
Albuquerque, New Mexico 87115

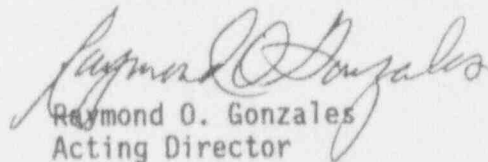

Dear Mr. Chernoff:

We have completed our review of Project Interface Documents (PIDs) Nos. 16-S-26 through 16-S-29 for the Ambrosia Lake, New Mexico, Uranium Mill Tailings Remedial Action Site submitted by your letter dated December 10, 1993. We agree that the changes proposed in PID Nos. 16-S-26, 16-S-27, and 16-S-28 are not Class I, and NRC concurrence is not required.

PID No. 16-S-29 is designated as a Class II change. As this PID concerns the final grading elevations of the north swale drainage and modifies the riprap protection of the cell, we consider this PID to be a Class I change. Based on a review of the changes shown on Sketch 1 provided with the PID, we conclude that there will be no significant changes to the disposal cell erosion protection and therefore concur with this PID.

If you have any questions, please contact me at (303) 231-5808.

Sincerely,

Raymond O. Gonzales
Acting Director
