Abstract

The "North Anna Unit 1 Interval 2 Program Plan" (the plan) was developed using the 1983 Edition through the Summer 1983 Addendum of ASME Section XI (the Code) as modified by relief request, and certain Code Case utilizations specified in the "North Anna Unit 1 Inservice Inspection Program for Components and Component Supports" (the Program). The Plan identifies the inspections, per component, proposed to complete the interval inservice inspection requirements. The Plan may be modified within the limitations of the Code and Program as needs may require. These modifications will be documented in the form of revisions to the Plan, which will be distributed to all controlled copies.

The Plan provides ASME Section XI examination requirements by period for each category and item number. Applicable relief requests are listed by applicable components or component supports. Augmented inspections are listed corresponding to Section 2.6 of the Program. Information is also provided on total component and component support populations, procedures to be used, calibration blocks to be used, and applicable drawings.

ASME SECTION XI EXAMINATIONS

Examinations required to complete the second interval program are provided in this section. These examinations are sorted by period, category, item number and class.

COMPONENTS AND COMPONENT SUPPORTS

Total component and component support populations within the ISI Class 1, 2, and 3 systems are provided in this section. The populations are sorted by category, item number and class, listing components and component supports not selected first, followed by the first period selection, the second period selection, and the third period selection in order. The total category count and item number count is also provided. Percentages, completion requirements required by the Code are met at the Category level.
