License No. 48-26074-01
Docket No. 030-31357

Dear Mr. Anderson:

This refers to the routine safety inspection conducted by Robert Gattone and E. J. Holt of this office on March 25, 1994, of activities authorized by NRC Byproduct Material License No. 48-26074-01, and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required. Violation No. 2. is a repeat violation from our April 1, 1990 inspection. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action that was proposed in 1990.

One additional violation was also identified consisting of failure to post current copies of your license and 10 CFR Parts 19, 20 and 21 as required by 10 CFR 19.11 and 21.6. However, since the violation is categorized as a Severity Level V violation which you committed to correct, we are exercising discretion pursuant to 10 CFR Part 2, Appendix C, Section VII.B. of the NRC's Enforcement Policy, and are not including this item in the Notice of Violation.

Two areas of concern were also identified and consist of: (1) failure to secure the gauge storage bin key from unauthorized persons; and (2) failure to include emergency telephone numbers on the front page of the shipping papers. It is our understanding that you will change the key storage area to restrict access from unauthorized persons, and you will revise your shipping papers to include the emergency telephone numbers on the first page.

Midwest Engineering Services, Inc. -2-

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,
Original Signed by B. J. Holt
