Washington, DC 20555

Re: Proposed Rule: Section 34.49

Gentlemen:

I agree with the old saying "If it ain't broke, don't mess with it." We have worked hard the last few years teaching our people how to make the proper surveys; now you want to change it.

Requiring our people to make a full 360 survey plus the entire length of the source tube has caused our radiographers to slow down and pay more attention to the survey meter. I think by doing so we have prevented many overexposures.

Let's leave a good thing alone.

Respectfully,

NORTH AMERICAN INSPECTION, INC.

Don B. Shumway
Radiation Safety Officer
